| Supplier            | Navy Heart Essential Oils, Calgary, Alberta, Canada |
| Document Issue Date | May 24, 2026                                        |

#### IFRA COMPLIANCE STATEMENT

Jojoba Carrier Oil is a fixed vegetable oil / carrier oil and is not an aromatic fragrance ingredient. It is therefore not subject to IFRA (International Fragrance Association) standards or usage limits.

IFRA standards apply exclusively to aromatic fragrance ingredients and their constituents — compounds that contribute to scent and that may cause dermal sensitization, phototoxicity, or systemic effects at elevated concentrations in finished products. Fixed carrier oils, vegetable oils, and non-aromatic cosmetic actives do not fall within the scope of IFRA regulation.

Jojoba Carrier Oil is considered suitable for use in all standard cosmetic product categories — including leave-on skincare (body lotions, face creams, serums, hand creams), rinse-off products (soap, body wash), and lip products — without any IFRA-imposed usage limit.

Jojoba is technically a liquid wax ester, not a triglyceride oil. It is exceptionally stable and resistant to oxidation.

#### GENERAL FORMULATION GUIDANCE

While no IFRA limits apply, Navy Heart recommends following standard cosmetic good manufacturing practice:

- Carrier oils are typically used at 5–100% of a formulation depending on product type.
- In leave-on body products, carrier oils are commonly used at 10–80% of the total formula.
- In face products, lighter carrier oils are generally used at lower levels (5–30%) to avoid a heavy feel.
- Patch testing is always recommended for finished products before wider customer use.

- Store oils away from heat, light, and air to prevent oxidation and rancidity.
  - Some individuals may have sensitivities to specific carrier oils (e.g., nut allergies for almond or argan oil).
- Always label ingredients clearly.
